Electricity at Work Regulations 1989

Certificate of Compliance

I confirm that 10 items of portable equipment and 11 mains leads were satisfactorily tested under the above regulations using Avo Megger Instruments Ltd PAT3 test equipment.

The following tests were carried out

- Visual observation
- Continuity
- Earth Bond test
- Insulation Test

The test were conducted during May 2017

Retesting periods as per recommendations in HSE publications HSG107 "Maintaining Portable and Transportable Electrical Equipment and also HSE publication HSE Indg247 " Electrical safety for Entertainers"
